INDEX TO SUBJECTS: LABORATORY MANAGEMENT, 1984

A

acetaminophen
assay of in biologic fluids; Aug., 53
overdosage; treatment; Aug., 52
rapid assay systems for; Aug; 51
acidosis; metabolic; Sept., 46
acquired immune deficiency syndrome; elevated thymosin α1 level; April, 22
anemia; runner's; Sept., 31
angiotensin-converting enzyme; diagnostic significance; Dec. 53
antibiotics
aminoglycosides; selection for *in vitro* susceptibility testing; Aug., 3
beta-lactam; aminoglycoside; selection for *in vitro* susceptibility testing; Aug., 33
beta-lactam; penicillin; selection for *in vitro* susceptibility testing; Aug., 34
cephalosporins; selection for *in vitro* susceptibility testing; Aug., 35
antibodies
monoclonal; in cytomorphology; Oct., 23
monoclonal; in diagnostic testing; Oct., 24
monoclonal; in improvement of immunoassays; Oct., 21
monoclonal; in quantifying hematopoietic stem cells in aplastic anemia and leukemia; Oct., 22
monoclonal; in T-cell identification; Oct., 22
platelet; assays and disease correlations; Aug., 40
antiepileptic drug therapy
antiepileptic drug-related enzyme induction; effects; March, 40
hepatic microsomal enzyme induction; March, 41
antigens
cellular; flow cytometry; May, 29
lymphocyte surface; flow cytometry; May, 32
antinuclear antibodies; testing for; Dec., 16
assay
enzyme-linked immunosorbent; in screening for HBsAg; Nov., 44
fluorescence polarization; therapeutic drug monitoring; July, 36
hereditary; recombinant DNA technology in diagnosis of; Nov., 54
immunofluorescence; serum autoantibody detection; May, 42
quantitation of glycosylated proteins by fructosamine measurement; Oct., 33
radioimmuno-; tuberculosis; March, 48
rapid system for acetaminophen; Aug., 53
thymosin α1; AIDS; April, 22
assays
antiplatelet antibody in thrombocytopenia; Aug., 43
catecholamine; nonroutine therapeutic drug monitoring; April, 46
glycosylated protein as indicator of blood glucose levels; Oct., 29
latex particle; agglutination inhibition testing; June, 37
latex particle; agglutination testing; June, 35
latex particle; evaluating tests for serologic diagnosis; July, 30
latex particle; forced adsorption; coupling; June, 34
latex particle; polymerization process; June, 27
latex particle; preparation for serodiagnosis; passive adsorption; June, 30
latex particle tests; interference in; July, 29
sex-steroid receptors; June, 22
solid-phase; for blood-typing and grouping; Dec., 39
atherosclerosis; cholesterol; May, 14
Atlas of Diagnostic Gastrointestinal Cytology (Takeda); (Book Review); May, 58
Atlas of Early Lung Cancer (National Cancer Institute); (Book Review); Oct., 49
autoimmune diseases
antibodies to DNA; histone antibodies; May, 45
antibodies to SM and RNP; antibodies to Scl-70 and centromeric antigen; antinucleolar antibodies; May, 46
autoantibody tests; interference by heterophile antibodies; May, 42
organ-specific; non-organ-specific; May, 39
salivary gland antibody; mitochondrial antibodies; reticulin antibodies; myelin antibodies; islet-cell antibodies; nuclear antibodies; May, 44
serum autoantibody detection; indirect immunofluorescence assay; May, 42
thyroid antibodies; gastric antibodies; adrenocortical antibodies; muscle antibodies; May, 43
automated hematology; instruments and parameters; Dec., 21

B

Bacillus cereus; as agent of foodborne illness; Sept., 56
bacterial plasmids; diagnostic fingerprinting of; May, 49
beta thalessemia major
bone iron deposition; osteoporosis; Jan., 37
bone metabolism; iron metabolism: Jan., 36
hydroxyapatite; Jan., 37
The Brain, Biochemistry, and Behavior: Proceedings of the Sixth Arnold O. Beckman Conference on Clinical Chemistry); (Book Review); Sept., 60
blood-gas measurements; in metabolic acidosis; Sept., 46
blood-typing and grouping; solid-phase assays for; Dec., 39
Branhamella catarrhalis; effects and identification; Dec., 49

C

cancer; breast; sex-steroid receptor assays in; June, 19
cholesterol
atheroma reversibility; May, 14
atherosclerotic plaque formation; May, 13
cholesterol; coronary heart disease; May, 13
coronary primary prevention trail; May, 14

INDEX TO SUBJECTS: LABORATORY MANAGEMENT, 1984

diabetes; quantity of hemoglobin in red cells; May, 13
screening; May, 14
chromatography; high-performance liquid; nonroutine therapeutic drug monitoring; April, 40
chromatography; thin-layer; in diagnosis of hyaline membrane disease; Oct., 17
CK and LD macroenzymes; Nov., 29
Clostridium perfringens; as agent of foodborne illness; Sept., 56
Collection and Handling of Laboratory Specimens: A Practical Guide. (Slockbower and Blumenfeld); (Book Review); Sept. 60
computers
complete microbiological information system: Oct., 41
in immunocompetence profiling, June, 15
software spreadsheets; for speeding analysis; as aids in organization of data; Oct., 37
coronary heart disease
cholesterol; May, 13
coronary primary prevention trail; reduction of cholesterol; May, 14

D

diabetes; screening; glycosylated protein assay; Oct., 29
diabetic ketoacidosis; laboratory's role in treatment; July, 10
diagnosis-related group; healthcare cost reimbursement; April, 32
disease
autoimmune; organ-specific; non-organ-specific; May 39
hyaline membrane; pathophysiology; Oct. 17
hematologic; monoclonal antibodies in diagnosis of; Oct., 21
hyaline membrane; TLC or enzyme assay definitive for pulmonary maturity; Oct., 18
hyaline membrane; treatment for; Oct., 17
hyperimmune; immunocompetence profile; June, 15
Lyme; Nov., 19
diseases
porphyrias; Sept., 35
sexually transmitted; an increasing list; parasitic; July, 15
DNA measurement; flow cytometry; May, 32
DNA; recombinant; in laboratory medicine; Nov., 51
drug monitoring
therapeutic; catecholamine assays; April, 46
therapeutic; with high-performance liquid chromatography; for caffeine; for theophylline; for moxalactom; April, 44
therapeutic; with high-performance liquid chromatography; for chloramphenicol; for propylthiouracil; April, 41
drug-screening
benzodiazepines; barbiturates; amphetamines; June, 49
hemogeneous enzyme immunoassay; thin-layer chromatographic technique; June, 45
opiates; June, 50
drugs; therapeutic; monitoring by fluorescence polarization; July, 8

E

electrophoresis; plasmid; May, 52
employee layoffs; stress for employee and employer; involving the employee in decision-making; Sept., 58
Escherichia coli; as agent of foodborne illness; Sept., 56
essential hypertension; Jan., 25

F

Fifty Diagnostic Special Stains for Surgical Pathology (Haas); (Book Review); April, 18
flow cytometry
detection of lymphocyte surface antigens; DNA measurement; cell-cycle analysis; tumor diagnosis; May, 32
single-cellular elements; cellular antigens; nucleic acids; May, 29
fluorescence polarization assay; July, 36
foodborne illness; cooperation with public-health facilities; Sept., 55

G

glucose; blood levels; glycosylated protein as indicator; Oct., 29
glycosylated protein assays; in diabetes; Oct., 29

H

HBsAg; blood-donor screening assay for; Nov. 43
hematology; automated; instruments and parameters; Dec., 21
hepatic function tests; antiepileptic drug therapy; March, 41
high-performance liquid chromatography; in nonroutine therapeutic drug monitoring; April, 40
hyaline membrane disease; pathophysiology; Oct., 17
hypertension
renal; essential; Jan., 25
renin-angiotenin-aldosterone system; Jan., 24
research frontiers; Jan., 27
sodium-renin relationship; Jan., 25

I

idiopathic thrombocytopenic purpura; adult form; childhood form; Aug., 41
immunoassay
fluorescence polarization; therapeutic drug monitoring; toxicology; July, 8
thin layer chromatography; screening for drugs; June, 45
immunoassays
improved by monoclonal antibodies; Oct., 21
immunocompetence profile; hyperimmune disease; June, 15

L

Laboratory Test Handbook (Jacobs, Kasten, Demott, and Wolfson); (Book Review); Sept., 61
laboratory pesonnel; and effects of economic and legislative change; Dec., 65
layoffs of; Sept., 58
productivity of; June, 53
latex particle assays; June, 27
Lyme disease; Nov., 19

M

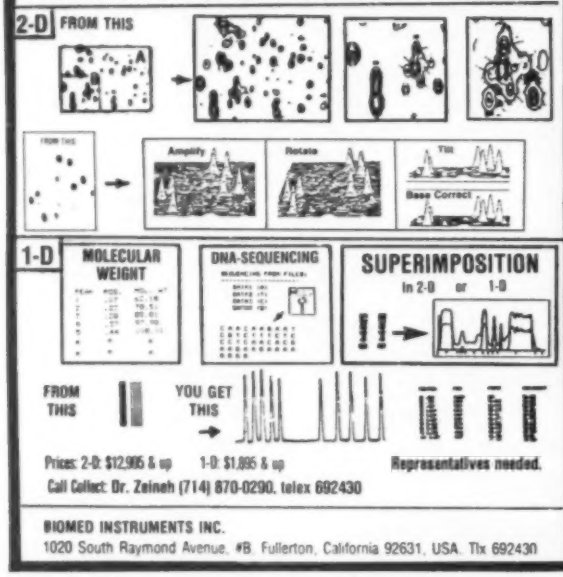
macroenzymes; CK and LD; Nov., 29
malnutrition
in newborns and infants; March, 16
in presurgical patients; in chronic alcoholism; April, 15
marasmus; kwashiorkor-like syndrome; April, 13
protein-calorie; April, 14
marijuana; tests for levels of; July, 29
metabolic acidosis
acid-base homeostasis; PCO_2 in diagnosis; Sept., 46
anion gap; Sept., 47
microbiology; computer system for; Oct., 41

2-D/1-D, 1-D & DNA
SOFT LASER SCANNING DENSITOMETERS
Quantitation, Contour & Pictorial Mapping
Superimposition and Autostep-over for 1-50 lanes of 1-D separation
3 microns resolution in X, 10 microns in Y axis

RIBBON LASER BEAM (up to 20mm long - 3 microns thin) or spot 3 microns diameter, **TUNGSTEN** and **UV**. Silver, coomassie..., or any stain. Fluorescence, reflectance, transmission and transmittance.

FOR SCANNING: 2-D or 1-D slab gels, X-Ray films, TLC plates and tubes, blots. Maximum scan area 450mm x 450mm. Automatic adjustable step-over.

STAND-ALONE SYSTEM: Friendly with Apple, HP, IBM. Independent if computer breaks. Programs available.



Prices: 2-D: $12,995 & up 1-D: $1,895 & up **Representatives needed.**
Call Collect: Dr. Zeineh (714) 870-0290. telex 692430

BIOMED INSTRUMENTS INC.

Circle No. 160 on Inquiry Card

INDEX TO SUBJECTS: LABORATORY MANAGEMENT, 1984

microcytosis
diagnosis; March, 31
disorders or globin metabolism; March, 32
disorders of protoporphyrin and heme synthesis; March, 37
interference with metabolic pathways; March, 29
iron deficiency; March, 29
monoclonal antibodies; Oct., 23

N

nucleic acids; flow cytometry; May, 29

P

plasmid fingerprinting
bacterial typing; May, 49
electrophoresis; May, 52
isolation of plasmid DNA; May, 50
with restriction endonuclease analysis; May, 55
platelet antibodies; Aug., 40
porphyrias
metabolic features; Sept., 36
quantitation of PBG and of α-ALA; Sept., 42
A Practical Handbook of Joint Fluid Analysis (Gatter); (Book Review); May, 58
productivity; increasing; communication in lab; June, 53

R

radioimmunoassay; for tuberculosis; March, 47
renal hypertension; Jan., 25
runner's anemia; Sept., 31

S

sarcoidosis; and angiotensin converting enzyme; Dec., 53
sex-steroid-binding proteins; estrogen receptor; cytoplasmic receptor; cytoplasmic-to-nuclear translocation of the ER; binding in the nucleus; June, 20
sex-steroid receptor assays
clinical correlations; June, 19
sex steroids
responsive tissues; fluctuations in the menstrual cycle; June, 21
serum levels; June, 19
sexually transmitted diseases; an increasing list; July, 15
Staphylococcus aureus; as agent of foodborne illness; Sept., 56
susceptibility testing; beta-lactam and aminoglycoside antibiotics; Aug., 35

T

testing; organ-specific; cost-effective; April, 32
therapeutic drug monitoring; nonroutine; high-performance liquid chromatography; April, 40
thrombocytopenia
antiplatelet antibody assays; Aug., 43
drug-induced; posttransfusion purpura; neonatal isoimmune; refractory state; Aug., 42
high platelet count; Aug., 40
thymosin α_1 assay; in AIDS; April, 22
thymus; AIDS; April, 22
tuberculosis; radioimmunoassay; March, 48
tumor-markers
radioimmunodetection; March, 23
tumor-specific, tumor-associated antigens; enzymes, hormones; March, 19

U

urinalysis; automated; control system for; Nov., 61

Z

Zinsser Microbiology (Joklik-Wilett et al.); (Book Review); Oct., 49

BUSINESS OPPORTUNITY

SELL YOUR CLINICAL LAB

We are presently interested in acquiring laboratories grossing in excess of $35,000 per month.

- Responsible, accurate analysis of the value of the lab within five days.
- 30-60 day closing.
- Top dollar value. All cash or cash to note. No Nonsense. No stock term or retention of sales deals. This is a legitimate offer.
- Call CLARK CRAIG and he'll give you the details.
